ACKNOWLEDGEMENT

I have taken effort and complete this summer internship. however , this dissertation would not have been possible without the guidance and help of several individuals who in one or another contributed and extended their valuable assistance in the preparation and completion of this internship.

I would like to express my gratitude to Preyan Technosys pvt.ltd.for giving me a chance to do my internship as a web designer which provided an opportunity to gain practical working experience in the company and professional working environment.

I am thankful to Ms. Vaishali Patel for their guidance and constant supervision as well as for providing necessary information regarding the web designing. I want to thank every industry person for their patience and assistance during my internship. Thanks to their guidance, I was able to develop web pages and learn about Web Designing.These skills will help me to expand my resume and advance my career

I would like to thank my mentor Prof. Parita P. Parekh, Information Technology Department, Sardar Vallabhbhai Patel Institute Of Technology, Vasad for trusting and believing in me to carry forward the project in which I had no prior experience. Her keen judgement and valuable insights at every stage of the project has been of great help to me.

Sincerely,
Trisa Patel
Date: 10th August, 2023

ABSTRACT

Summer Internship/Training is an integral part of the B.Tech(IT) program. The objective of such an exercise is to get a first-hand exposure to the realities of the IT segment and gain an insight into the working of the corporate world and develop technical and communicational skills. The summer training gives an opportunity to become aware of the student's strengths and weakness as required for potential IT experts.

This report describes my internship in . Preyan Technosys Pvt. Ltd. is a leader in Technology Training, Soft Skill Training and Recruitment solutions.

During my internship I was introduced to some new technologies and languages. But the most amazing experience was to work in multicultural work environment culture.

This internship lent me to showcase my skills and training of the concepts and technologies in a professional manner. Through this internship I got an opportunity to be in a team and to enhance communicational skills and to collaborate and connect with different ideas and brains.

Sardar Vallabhbhai Patel Institute of Technology provides that glorious opportunity to their student of having an internship within their bachelor program. During my internship I was introduced to some new technologies and languages. But the most amazing experience was to work in multicultural work environment culture.

CHAPTER 2: OVERVIEW OF THE INTERNSHIP

- **About Project**

  The project is about designing a web page which gives information about the business and the company's services using html, css and bootstrap. Header of the web page contains navigation link. By clicking on that link we cane reach to particular portion of the web page.footer will contain other navigation links and copyright info.

- **Scope of the Project**

  Scope of this project is to give brief information about the business and company in a single page without much more loading and buffering. you don't need to scroll whole page to reach to a particular part of the page you just need to click on the navigation link on the navigation bar and you will reach there.

FEATURES OF THE PROJECT:

1. You can see all the business info in one single page by just one click.
2. You don't need to go on different page for any further info or analysis.
3. Enhance user experiences.

FIGURE 1: NAVIGATION BAR

You can see the navigation bar in the picture which is done by bootstrap navigation bar properties and values. hover effect is also given to the each navigation link.

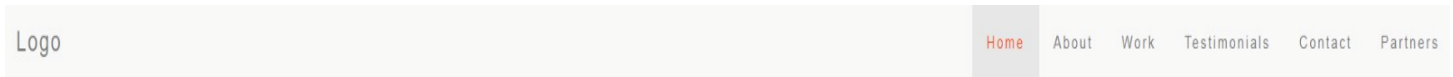

FIGURE 2: HOME

This is the home section of the web page.in this section I get introduce to the bs jumbotron class and how to give background image. I also get information about different icons in this section. And the most important part of bootstrap is used in this home section which is grid. I'll get basic knowledge about the bootstrap grids.
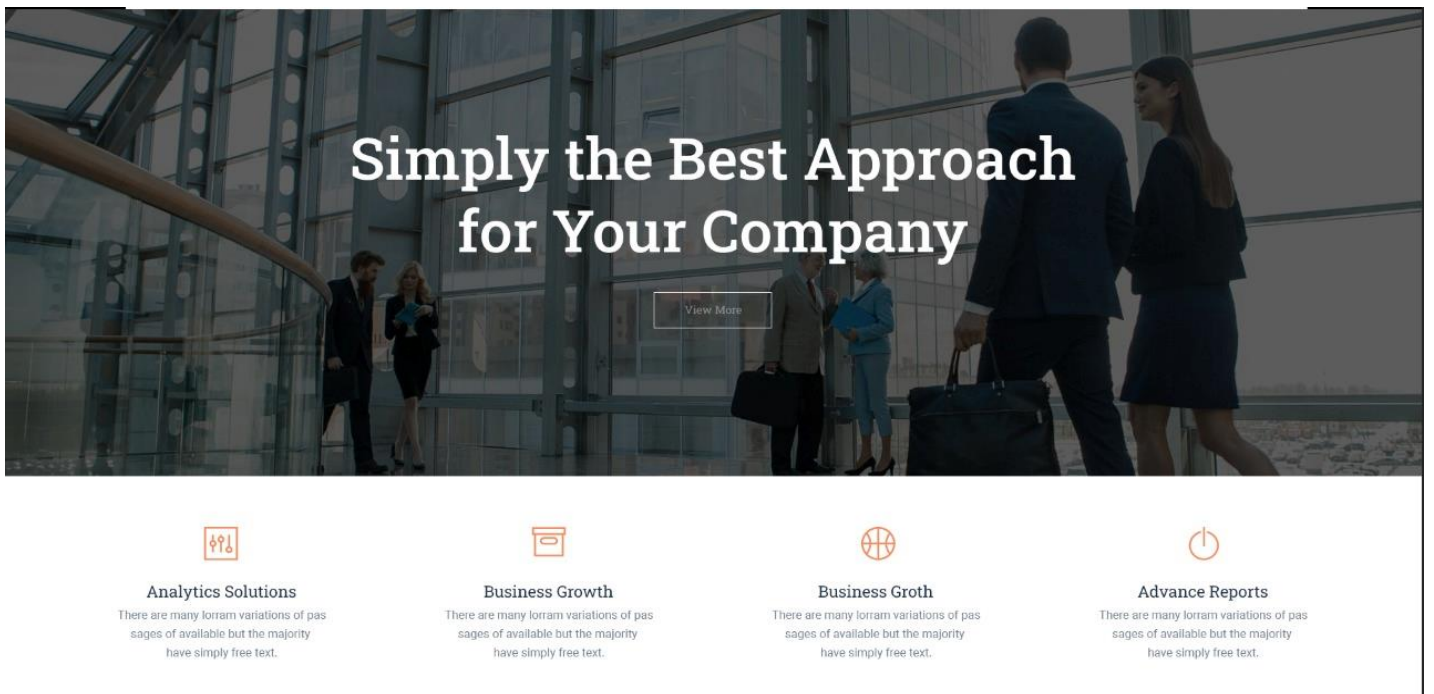

FIGURE 3: ABOUT

In this section we get the information about the business.in this section I'll get knowledge about container class of the bootstrap. I also get the difference between container and container-fluid.

Container class take the fixed size box for operating while container fluid class takes the whole width of the device for operating.

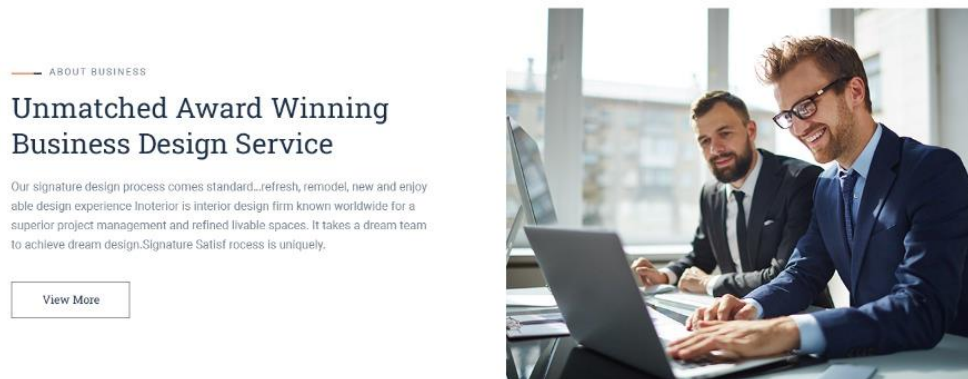

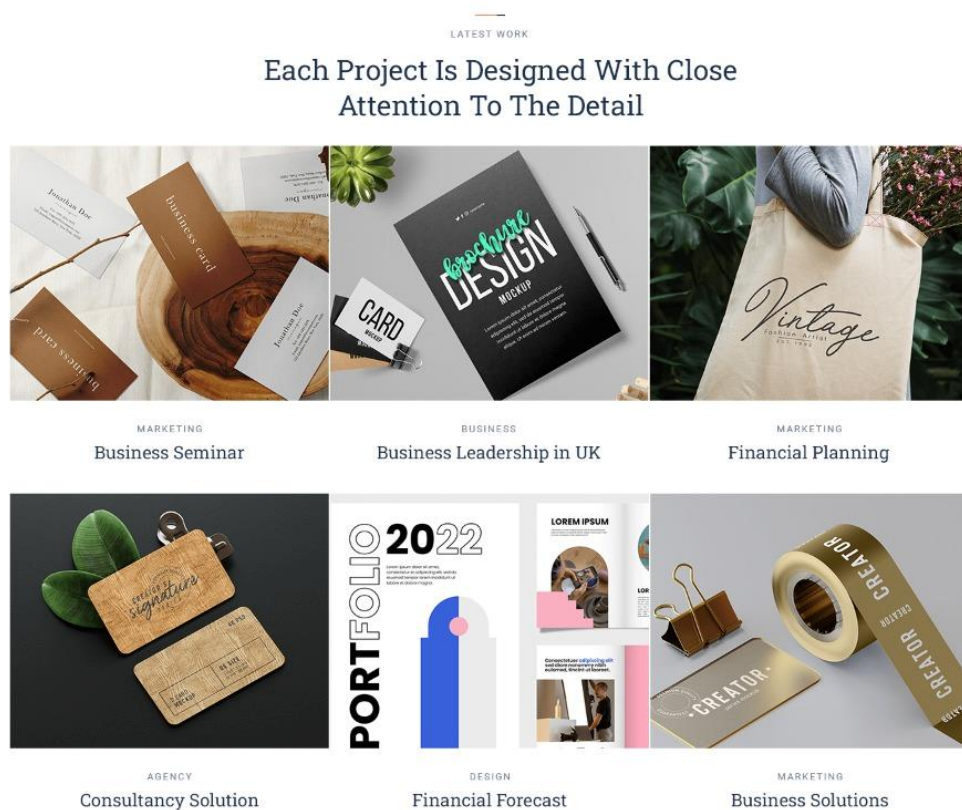

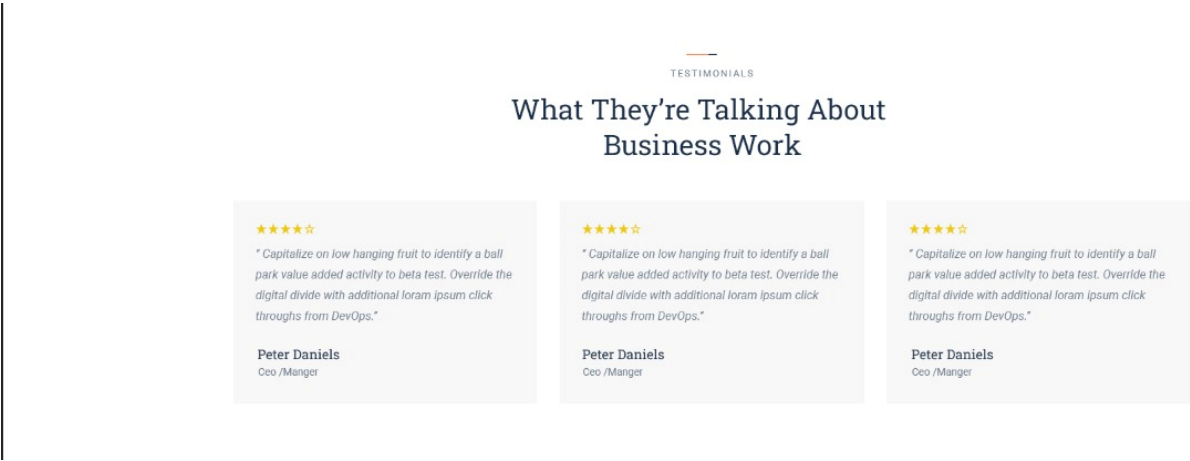

FIGURE 4: WORK

In this section I'll get knowledge about advanced property of image tag. I understand how to add a responsive image to the web page. I'll get knowledge about various image classes for different image shapes.

FIGURE 5: TESTIMONIALS

In this section I'll get better knowledge about CSS border, width, margin, and padding property.in this section we can see the customers review for the company business.in this section I understand about the <address>tag of the html. I'll also understand the position property of CSS as well for taking text upon the image given on the web page.
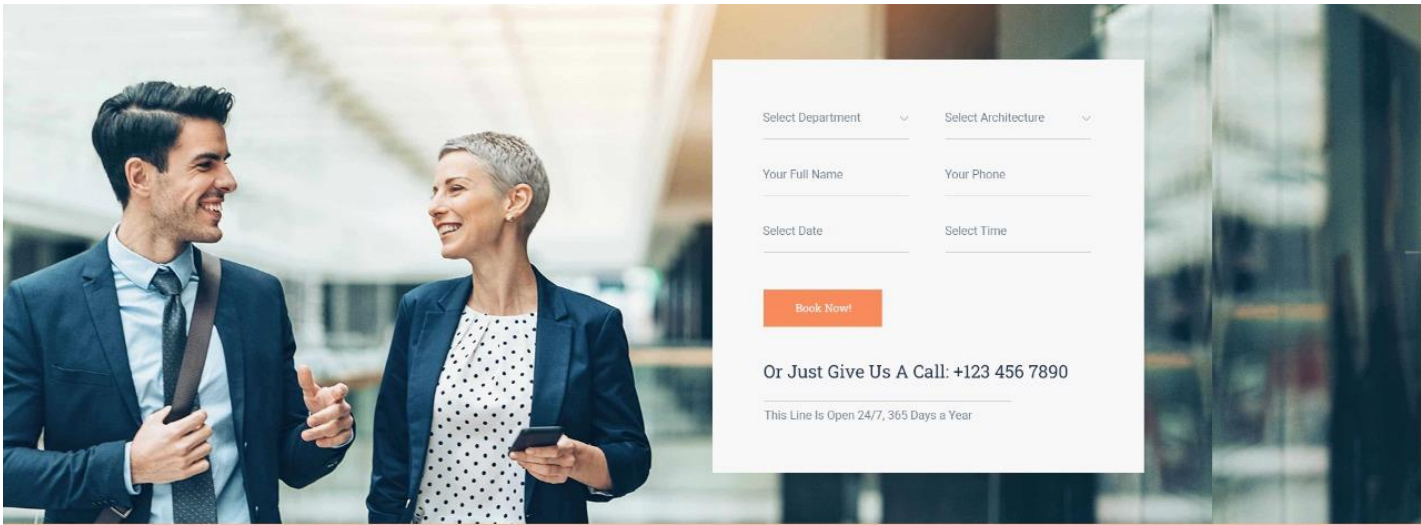

FIGURE 6: PARTNERS

This section shows the partnership of the company with other clients and companies. From this section we know the efficiency of the company and business.

BUSINESS PARTNERS

Our Valuable Clients & Partnes

DELIVERY   OKTA smart solutions   DETERS consulting group   Solana company

FIGURE 7: CONTACT

This section shows the contact information of the company. This section also have the contact number to get touch with the company. In this section I'll also get more knowledge about CSS rgb properties as well. There is also the address of the company in this section.

CHAPTER 3: CONCLUSION

The work experiences I encountered during the internship allowed me to develop my html and css knowledge. I think I still require to work on my other skills required for web designing. But, the overall experience was positive, and everything I learned would be useful in my future career in this field. I utilize my time and energy to acquire as much knowledge and skills as possible. I managed to adapt myself to the working environment with the support from the supervisor and other employees of the company.

I had encountered several difficulties during the internship period. The first difficulty that I faced was the inexperience and knowledge about bootstrap. It's a very big challenge for me to pick up the method within a short time. However, I had finally known about the bootstrap and managed the difficulties that I have faced successfully.

During my internship I was introduced to some new technologies and languages. But the most amazing experience was to work in multicultural work environment culture.

I am extremely satisfied by this internship and I am grateful to Preyan Technosys Pvt. Ltd. for providing me opportunity to do an internship in their company.
